Teaching with the Power of Digital Media

COURSE DESCRIPTION
This two-semester Algebra 1 course has been developed for first-time algebra students with a broad range of ability levels, from remedial to advanced. The content is correlated to all US state algebra frameworks and The Common Core. This course can be used as a stand-alone or as a supplement to any algebra textbook.

The flexible, learner-centered approach offers a portfolio of learning objects designed to open the door to mathematics concepts, procedures, mathematical reasoning and critical thinking for learners.

Students work through activities in a sequence that leverages their own successful learning strategies while building their 21st century skills.
